[Telematika] Editor Decision

Rizki Wahyudi <rizki.key@gmail.com>

26 Januari 2024 pukul 10.15

Kepada: sarjon_defit@UPIYPTK.AC.ID, agus.perdana@amiktunasbangsa.ac.id, putrama@amiktunasbangsa.ac.id

Dear Sarjon Defit

We have reached a decision regarding your submission to Telematika, "Comparative Analysis of Classification Methods in Sentiment Analysis: The Impact of Feature Selection and Ensemble Techniques Optimization".

Our decision is to: Revision Required

Reviewer A Comments:

Abstract: *

Well-written and informative, the article effectively covers its content. However, the title does not yet address the context of political sentiment on social media.

Additional details regarding the procedural steps taken in this research should be included.

The conclusion of the abstract is general and lacks details regarding practical implications or more specific directions for future research.

Introduction: *

explanation is commendable. However, it is recommended to seek references that specifically delve into the theme of sentiment analysis in politics.

Method: *

The analysis was conducted only on 1200 tweets from a short time period (December 10-11, 2023) with a focus on specific keywords ("Indonesia" and "capres"). The small sample size and the selection of specific keywords may limit the generalization of results and may not reflect a broader range of sentiments.

Result and Discussion: *

Figure 4 having a 100% score seems too good to be true. This suggests potential data saturation and indicates the need for additional data. Therefore, I kindly request the editor and suggest to the author to provide both the raw and cleaned data that has been analyzed.

Bibliography/Reference dan Citations: *

The references cited are well-chosen

[Telematika] Copyediting Review Request

Rizki Wahyudi <rizki.key@gmail.com>

Kam, 22 Feb, 10.29

Ke: <sarjon_defit@UPIYPTK.AC.ID>, <agus.perdana@amiktunasbangsa.ac.id>, <putrama@amiktunasbangsa.ac.id>

Dear Sarjon Defit, Agus Perdana Windarto, Putrama Alkhairi

Kiriman Anda "Analisis Komparatif Metode Klasifikasi dalam Analisis Sentimen: Dampak Pemilihan Fitur dan Optimasi Teknik Ensemble" untuk Telematika telah melalui tahap copyediting pertama.

Ini adalah kesempatan terakhir untuk membuat perubahan penyalinan substansial pada kiriman. Tahap pengoreksian, setelah persiapan dapur, dibatasi pada perbaikan kesalahan ketik dan tata letak. Silakan periksa naskah di lampiran

Bukti dapur harus dikembalikan ke Telematika pada tanggal 24 Februari 2024. Selanjutnya, Anda bertanggung jawab atas segala kesalahan dalam makalah yang diterbitkan karena kelalaian Anda. Silakan balas email ini untuk mengirimkan naskah akhir Anda. Terima kasih atas kontribusi Anda pada jurnal ini.
