ABSTRACT

RELATIONSHIP BETWEEN PERCEIVED ORGANIZATIONAL SUPPORT WITH JOB SATISFACTION AT EMPLOYEES OF PT. YASIGA SARANA UTAMA

This study aims to determine the relationship between Perceived Organizational Support and Job Satisfaction at PT. Yasiga Main Facilities. The research variables are Perceived Organizational Support (X) and Job Satisfaction (Y). The data collection method is distributing questionnaires with a sample of 160 employees of PT.Yasiga Sarana Utama. The subject of this study used the Purposive Sampling Technique. The measurement tools used in this study are the Perceived Organizational Support scale and the Job Satisfaction Scale.

The data analysis method used to test the hypothesis in this study is to use the Pearson product moment correlation (Pearson) which was carried out with the help of IBM SPSS version 21.0, which shows that the correlation coefficient value is $r = 0.461$ with a value of (p) sig = 0.000, because the value (p) sig 0.000 <0.01, which means that there is a very significant relationship between perceived organizational support and job satisfaction in a positive direction, meaning that the higher the Perceived Organizational Support, the higher the job satisfaction. Conversely, the lower the Perceived Organizational Support, the lower the job satisfaction of PT. Yasiga Sarana Utama employees. It means that the research hypothesis can be accepted. The effective contribution of the variable Perceived Organizational Support to job satisfaction 21%
