HUBUNGAN ANTARA *TASK AVERSIVENESS* DENGAN PROKRASTINASI AKADEMIK TUGAS AKHIR PADA MAHASISWA JURUSAN PARIWISATA PRODI MANAJEMEN PERHOTELAN FAKULTAS PARIWISATA DAN PERHOTELAN ANGKATAN 2017-2018 UNIVERSITAS NEGERI PADANG

ABSTRAK

Task aversiveness memiliki dampak terhadap sikap prokrastinasi akademik yang dilakukan mahasiswa. Penelitian ini bertujuan untuk mengetahui hubungan antara *task aversiveness* dengan prokrastinasi akademik tugas akhir pada mahasiswa Jurusan Pariwisata Prodi Manajemen Perhotelan Fakultas Pariwisata dan Perhotelan Angkatan 2017-2018 Universitas Negeri Padang. Penelitian ini menggunakan pendekatan kuantitatif dengan metode korelasi. Alat ukur yang digunakan pada penelitian ini yaitu skala *task aversiveness* dan prokrastinasi akademik. Jumlah sampel 112 mahasiswa Jurusan Pariwisata Prodi Manajemen Perhotelan Fakultas Pariwisata dan Perhotelan Angkatan 2017-2018 Universitas Negeri Padang. Pengambilan sampel menggunakan metode *probability sampling* dengan teknik *simple random sampling*. Analisis data dilakukan dengan menggunakan analisis kolerasi *rho (p)* dari Spearman. Hasil penelitian menunjukan nilai koefisien kolerasi *rho (p)* sebesar 0,410 dengan nilai p = 0,000. Hal ini menunjukan bahwa terdapat hubungan positif yang signifikan antara *task aversiveness* dengan prokrastinasi akademik pada mahasiswa Jurusan Pariwisata Prodi Manajemen Perhotelan Fakultas Pariwisata dan Perhotelan Angkatan 2017-2018 Universitas Negeri Padang. Berarti semakin tinggi *task aversiveness* maka semakin tinggi prokrastinasi akademik dan semakin rendah *task aversiveness* maka semakin rendah prokrastinasi akademik. Sumbangan efektif variabel task aversiveness terhadap variabel prokrastinasi akademik sebesar 17%.

ABSTRACT

Task aversiveness greatly affects the academic procrastination of students. This study aims to determine the relationship between task aversiveness and academic procrastination final assignments on students in the tourism department of hospitally management study program, faculty of tourism and hospitally class of 2017-2018 Univeritas Negeri Padang. This study used a quantitative approach with a correlation method. The measuring instrument used in this study was task aversiveness scale and academic procrastination scale. The population in this study was student at tourism department of hospitally management study program, the sampel was 112 students of the tourism department of hospitally management study program, faculty of tourism and hospitally class of 2017-2018 Universitas Negeri Padang. this study used probability sampling method with simple random sampling technique. Data analysis was carried out used the rho (ρ) correlation thecniques from Spearman. The results showed that the correlation coefficient of rho (ρ) is 0.410 with a (ρ) is 0.000. This showed that there was very significant positive relationship between task aversiveness and academic procrastination students in the tourism department of hospitally management study program, faculty of tourism and hospitally class of 2017-2018 Universitas Negeri Padang. It means that the higher the task aversiveness, the higher the academic procrastination and the lower the task aversiveness, the lower the academic procrastination. The effective contribution of the task aversiveness variable to the academic procrastination variable is 17%.
