EDUCATIONAL STAGE	: STRATA-1 (S1)
ACADEMIC SUPERVISOR	: 1. Gushelmi, S.Kom.M.Kom 2. Syafrika Deni Rizki, S.Kom, M.Kom

Medical equipment is one of the most important things in health centers, hospitals, or other health care facilities. Medical devices will be tools that are directly related to the safety of a person's life, healing of diseases, by using these tools in examination, diagnosis, healing, treatment, and maintenance. Seeing the importance of this procurement and it is directly related to one's life, it is not permissible to choose it lightly. To choose the right tool, you can start with choosing where to buy it. Pemancungan Health Center is a health service that interacts directly with the community that is comprehensive in nature with its activities consisting of promotive, preventive, curative and rehabilitative efforts. Selection of suppliers or suppliers is a strategic activity and quite difficult because it involves more than one criterion. Utilizing the SMART method helps in selecting several suppliers so that the Pemanmpangan Health Center can find the right criteria and alternatives. The criteria and weights used in this method are Offer Price (C1) with a weight of 20, Payment System (C2) with a weight of 20, Conformance of Specifications (C3) with a weight of 15, Product Warranty (C4) with a weight of 15, Service Contracts (C5) with a weight of 10, Branded/Manufacturer (C6) with a weight of 10 and Product Population (C7) with a weight of 10. and there are 5 alternatives to be tested. Based on the results of the study, it was found that Company 2 was the best alternative from the criteria determined by the value calculated using the SMART method of (58.75).

Keyword : Medical equipment, Suppliers, SMART, PuskesmasPemancungan
