ABSTRAK

HUBUNGAN ANTARA FEAR OF FAILURE DENGAN ACADEMIC DISHONESTY PADA SISWA KELAS XI IPA SMA 12 PADANG

Penelitian ini bertujuan untuk mengetahui hubungan antara *Fear Of Failure* dengan *Academic Dishonesty* pada siswa kelas XI IPA SMA N 12 Padang. Variabel bebas dalam penelitian ini adalah *Fear Of Failur*e, sedangkan variabel terikat dalam penelitian ini adalah *Academic Dishonesty*. Teknik pemilihan sampel dalam penelitian ini menggunakan ketentuan tabel *Isaac and Michael* untuk tingkat kesalahan 10% dengan jumlah populasi 215 siswa didapati jumlah sampel sebanyak 118 siswa. Uji validitas dan reliabilitas menggunakan *Alpha Cronbach*. Hasil uji coba menunjukkan koefisien validitas pada skala *Fear Of Failure* didapatkan *corrected item-total correlation* berkisar antara 0,318 sampai dengan 0,602, sedangkan koefisien reliabilitasnya sebesar 0,913. Hasil uji coba koefisien validitas skala *Academic Dishonesty* menunjukkan *corrected item-total correlation* berkisar antara 0,393 sampai dengan 0,783, dengan koefisien reliabilitasnya sebesar 0,959. Hasil uji hipotesis menunjukkan besarnya koefisien korelasi sebesar 0,562 dengan taraf signifikansi p = 0,000 yang berarti bahwa adanya korelasi yang sedang dan signifikan dengan arah positif antara *Fear Of Failure* dengan *Academic Dishonesty*. Nilai positif menunjukkan bahwa semakin tinggi *Fear Of Failure* maka semakin tinggi *Academic Dishonesty*, serta semakin rendah *Fear Of Failure* maka semakin rendah *Academic Dishonesty* pada siswa. Adapun sumbangan efektif dari variabel *Fear Of Failure* dengan *Academic Dishonesty* sebesar 32%.

Kata Kunci : *Fear Of Failur*e, *Academic Dishonesty,* siswa SMA, XI IPA

ABSTRACT

THE RELATIONSHIP BETWEEN FEAR OF FAILURE AND ACADEMIC DISHONESTY IN GRADE XI IPA STUDENTS OF SMA 12 PADANG

This study aims to determine the relationship between Fear Of Failure and Academic Dishonesty in class XI IPA SMA N 12 Padang students. The independent variable in this study is Fear Of Failure, while the dependent variable in this study is Academic Dishonesty. The sample selection technique in this study used the provisions of the Isaac and Michael table for an error rate of 10% with a population of 215 students found a sample size of 118 students. Validity and reliability tests using Cronbach's Alpha. The test results showed the validity coefficient on the Fear Of Failure scale obtained corrected item-total correlation ranging from 0.318 to 0.602, while the reliability coefficient was 0.913. The test results of the validity coefficient of the Academic Dishonesty scale show the corrected item-total correlation ranges from 0.393 to 0.783, with a reliability coefficient of 0.959. The results of hypothesis testing show a correlation coefficient of 0.562 with a significance level of $p = 0.000$, which means that there is a moderate and significant correlation with a positive direction between Fear Of Failure and Academic Dishonesty. The positive value indicates that the higher the Fear Of Failure, the higher the Academic Dishonesty, and the lower the Fear Of Failure, the lower the Academic Dishonesty in students. The effective contribution of the Fear Of Failure variable with Academic Dishonesty is 32%.
