ABSTRACT

THE RELATIONSHIP BETWEEN FANATICISM AND VERBAL AGGRESSIVE BEHAVIOR ON SOCIAL MEDIA IN FEMALE STUDENTS AT SMAN 4 PADANG CITY WHO IDOLIZE KPOP.

The purpose of this study was to determine the relationship between fanaticism and verbal aggressive behavior, this study used a measuring instrument for fanaticism scale and verbal aggressive behavior, the sampling technique in this study used random sampling technique, the number of samples taken was 83 in class XI students at SMAN 4 Padang City. Based on the results of the Product Moment (Pearson) correlation test, the value (p) sig 0.000 < 0.01, so the hypothesis is accepted, the correlation coefficient value (r) = 0.587 is obtained. These results indicate that there is a very significant relationship between fanaticism and verbal aggressive behavior in class XI female students at SMAN 4 Padang City with a positive direction, meaning that if fanaticism is high, the higher the verbal aggressive behavior, and vice versa if fanaticism is low, the lower the verbal aggressive behavior.
