

ABSTRAK

HUBUNGAN ANTARA *SENSATION SEEKING* DENGAN *RISK TAKING BEHAVIOR* PADA KOMUNITAS PENDAKI *WARMADEWA ADVENTURE*

Penelitian ini bertujuan untuk mengetahui hubungan antara *sensation seeking* dengan *risk taking behavior* pada Komunitas pendaki Warmadewa Adventure. Variabel bebas dalam penelitian ini adalah *sensation seeking* sedangkan variabel terikat adalah *risk taking behavior*. Alat ukur yang digunakan dalam penelitian ini adalah skala *sensation seeking* dan *risk taking behavior*. Teknik pengambilan sampel dalam penelitian ini menggunakan *sampling jenuh*. Sampel dalam penelitian ini adalah 37 orang anggota Komunitas pendaki Warmadewa Adventure. Uji validitas dan reliabilitas pada penelitian ini menggunakan teknik *Alpha Cronbach* dan *construct reliability*. Hasil koefisien validitas pada skala *sensation seeking* bergerak dari $r_{ix} = 0,334$ sampai dengan $r_{ix} = 0,824$ dengan nilai koefisien reliabilitas $\alpha = 0,948$ sedangkan hasil koefisien validitas pada skala *risk taking behavior* bergerak dari $r_{ix} = 0,309$ sampai dengan $r_{ix} = 0,710$ dengan nilai koefisien reliabilitas $\alpha = 0,892$. Berdasarkan analisis data, diperoleh nilai korelasi sebesar 0,654 dengan taraf signifikansi 0,000 yang berarti hipotesis diterima. Hal ini menunjukkan bahwa ada hubungan antara *sensation seeking* dengan *risk taking behavior* pada Komunitas pendaki Warmadewa Adventure. Adapun sumbangan efektif dari variabel *sensation seeking* terhadap variabel *risk taking behavior* adalah sebesar 43% dan sisanya 57% lagi dipengaruhi oleh faktor lain.

Kata kunci: *sensation seeking*, *risk taking behavior*, komunitas

ABSTRACT

RELATIONSHIP BETWEEN SENSATION SEEKING AND RISK TAKING BEHAVIOR IN THE CLIMBING COMMUNITY WARMADewa ADVENTURE

This study aims to determine the relationship between sensation seeking and risk taking behavior in the Warmadewa Adventure Climbing Community. The independent variable in this study is sensation seeking while the dependent variable is risk taking behavior. The measuring instrument used in this study is the sensation seeking and risk taking behavior scales. The sampling technique in this study used saturated sampling. The sample in this study was 37 members of the Warmadewa Adventure Climbing Community. The validity and reliability tests in this study used the Alpha Cronbach and construct reliability techniques. The results of the validity coefficient on the sensation seeking scale moved from $\alpha = 0.334$ to $\alpha = 0.824$ with a reliability coefficient value of $\alpha = 0.948$ while the results of the validity coefficient on the risk taking behavior scale moved from $\alpha = 0.309$ to $\alpha = 0.710$ with a reliability coefficient value of $\alpha = 0.892$. Based on data analysis, a correlation value of 0.654 was obtained with a significance level of 0.000 which means the hypothesis is accepted. This shows that there is a relationship between sensation seeking and risk taking behavior in the Warmadewa Adventure Climbing Community. The effective contribution of the sensation seeking variable to the risk taking behavior variable is 43% and the remaining 57% is influenced by other factors.

Keywords: sensation seeking, risk taking behavior, community
