

## ABSTRAK

### HUBUNGAN ANTARA *SCHOOL WELL BEING* DENGAN *STUDENT ENGAGEMENT* PADA SISWA KELAS X dan XI SMAN 1 PARIANGAN

Penelitian ini bertujuan untuk mengetahui hubungan antara *school well-being* dengan *student engagement* pada siswa kelas X dan XI SMAN 1 Pariangan. Variabel bebas dalam penelitian ini adalah *School Well-being* dan variabel terikat dalam penelitian ini adalah *Student Engagement*. Alat ukur yang digunakan dalam penelitian ini adalah skala *school well-being* dan skala *student engagement*. Teknik pengumpulan sampel dalam penelitian ini menggunakan *simple random sampling*. Sample dalam penelitian ini yaitu sebanyak 165 siswa kelas X dan XI di SMAN 1 Paringan. Hasil koefisien validitas pada skala *Student Engagement* dengan nilai *corrected item-total correlation* berkisar antara 0,384 sampai dengan 0,794 sedangkan koefisien reliabilitasnya sebesar 0,933. Hasil koefisien validitas pada skala *School Well Being* dengan nilai *corrected item-total correlation* berkisar antara 0,359 sampai dengan 0,779 sedangkan koefisien reliabilitasnya sebesar 0,923. Berdasarkan analisis data, nilai korelasi 0,300 dengan tingkat signifikansi 0,000 diperoleh, yang berarti hipotesis diterima. Ini menunjukkan bahwa ada hubungan yang signifikan antara *School Well Being* dan *Student Engagement* dengan arah positif pada siswa kelas X dan XI di SMAN 1 Pariangan. Kontribusi efektif dari variabel *School well being* terhadap *Student Engagement* adalah sebesar 9%.

**Kata kunci:** *student engagement, school well being, siswa*

## **ABSTRACT**

### ***THE RELATIONSHIP BETWEEN SCHOOL WELL-BEING AND STUDENT ENGAGEMENT FOR STUDENT OF CLASS X AND XI SMAN 1 PARIANGAN***

*This research aims to determine the relationship between school wellbeing and student engagement in class X and XI students at SMAN 1 Pariangan. The independent variable in this research is School Welfare and the dependent variable in this research is Student Engagement. The measuring instruments used in this research are the school welfare scale and the student engagement scale. The sample collection technique in this research used simple random sampling. The sample in this research was 165 students in class X and XI at SMAN 1 Parrangan. The results of the validity coefficient on the Student Engagement scale with the item-total correlation correction value range from 0.384 to 0.794 while the reliability coefficient is 0.933. The results of the validity of the coefficient on the School Well Being scale with the item-total correlation correction value range from 0.359 to 0.779 while the reliability coefficient is 0.923. Based on data analysis, a correlation value of 0.300 was obtained with a significance level of 0.000, which means the hypothesis was accepted. This shows that there is a very significant relationship between School Well Being and Student Engagement in a positive direction for class X and XI students at SMAN 1 Pariangan. The effective contribution of the School Wellbeing variable to Student Engagement is 9%.*
