

ABSTRAK

HUBUNGAN ANTARA *FORGIVENESS* DENGAN PERILAKU AGRESI PADA SISWA DI SMAN 3 SAWAHLUNTO

Penelitian ini bertujuan mengetahui Hubungan Antara *Forgiveness* dengan Perilaku Agresi pada Siswa SMAN 3 Sawahlunto. Variabel penelitian yaitu *forgiveness* (X) dan perilaku agresi (Y). Metode pengumpulan data menyebar kuesioner dengan sampel 113 siswa SMAN 3 Sawahlunto. Adapun sampel penelitian ini menggunakan *sampling jenuh*. Alat ukur yang digunakan dalam penelitian ini adalah skala *forgiveness* dan perilaku agresi. Metode analisis data yang digunakan untuk pengujian hipotesis dalam penelitian ini adalah dengan menggunakan korelasi (Pearson) *product moment pearson* yang dilakukan dengan bantuan IBM SPSS versi 21.0, yang menunjukkan bahwa nilai koefisien korelasi $r = -0,617$ dengan nilai $(p) \text{ sig} = 0,000$. Karena nilai $(p) \text{ sig} = 0,000 < 0,01$ yang berarti terdapat hubungan yang sangat signifikan antara *forgiveness* dan perilaku agresi dengan arah negatif, artinya semakin tinggi *forgiveness* seorang siswa maka semakin rendah perilaku agresi, dan sebaliknya semakin rendah *forgiveness* maka semakin tinggi perilaku agresi pada siswa SMAN 3 Sawahlunto. Berarti hipotesis penelitian dapat diterima. Sumbangan efektif variabel *forgiveness* dan perilaku agresi 38,1%.

Kata Kunci: *Forgiveness*, Perilaku Agresi, Siswa SMA

ABSTRACT

THE RELATIONSHIP BETWEEN FORGIVENESS AND AGGRESSION BEHAVIOR IN STUDENTS AT SMAN 3 SAWAHLUNTO

This research aims to determine the relationship between Forgiveness and Aggressive Behavior in Students at SMAN 3 Sawahlunto. The research variables are forgiveness (X) and aggressive behavior (Y). The data collection method was distributing questionnaires to a sample of 113 students of SMAN 3 Sawahlunto. The sample for this study used saturated sampling. The measuring instrument used in this research is a scale of forgiveness and aggressive behavior. The data analysis method used to test the hypothesis in this research is using Pearson product moment (Pearson) correlation which was carried out with the help of IBM SPSS version 21.0, which shows that the correlation coefficient value is $r = -0.617$ with a (p) value of $\text{sig} = 0.000$. Because the value (p) $\text{sig} = 0.000 < 0.01$ which means that there is a very significant relationship between forgiveness and aggressive behavior in a negative direction, meaning that the higher a student's forgiving attitude, the lower the aggressive behavior, and conversely, the lower the forgiving attitude, the lower the level of forgiveness. the higher the aggressive behavior of students at SMAN 3 Sawahlunto. This means that the research hypothesis can be accepted. The effective contribution of the forgiveness variable and aggressive behavior is 38.1%.
