**Cici Indriyani, 2020, The Relationship Between Empathy and Prosocial Behavior In Class X Students of SMK Dhuafa Padang Even Semester Academic Year 2019/2020, Bachelor of Counseling Guidance Education, Teaching Faculty of Education, Putra Indonesia University "YPTK" Padang.**

This study aims to determine the relationship between empathy and prosocial behavior in class X SMK Dhuafa Padang even semester 2019/2020 academic year. The study population numbered 167 people registered in the 2019/2020 school year, with a sample of 123 people who were taken using the Proportional Random Sampling technique. The method used in this research is quantitative with the type of research that is correlational. This study examines the relationship between empathy and prosocial behavior in students. Quantitative research is the systematic scientific study of charts and phenomena and relationships. The instrument used in data collection in this study was a questionnaire arranged according to the Likert scale model. Data analysis was performed using statistical programs on the SPSS 20 computer and Microsoft Excel. Based on the results of the hypothesis the value of r count is 0.911 while the r table value is 0.172 because the value of r count is greater than the value of r table ( $0.911 > 0.172$ ), there is a relationship between empathy and prosocial behavior.

**Keywords : Empathy, Prosocial Behavior**
