Billy Hendrik:

We have reached a decision regarding your submission to International Journal on Advanced Science, Engineering and Information Technology, "A New Robotic Learning Activity Design to Increase the Figural Creativity: Originality, Elaboration, Flexibility, and Fluency".

Our decision is to: Revision Required

Please submit your revision in 10 days. More than 10 days of paper will be rejected from the system. Re-upload your revision into journal system NOT via email.

Editor

Reviewer A:

This manuscript does not yet have sufficient novelty and does not yet have a good contribution to research. Writing is not sufficient to confirm and verify the method properly.

We have reached a decision regarding your submission to International Journal on Advanced Science, Engineering and Information Technology, "A New Robotic Learning Activity Design to Increase the Figural Creativity: Originality, Elaboration, Flexibility, and Fluency".

Our decision is to: Revision Required

Please update your abstract into 220-250 words and your reference 70% in (2017-2021) from journal indexed by Scopus. Citation and Reference in Paper must using Mendeley with IEEE Style.

Please submit your revision (Template IJASEIT 2021) in 10 days. More than 10 days of paper will be rejected from the system. Re-upload your revision into journal system NOT via email.

Editor

Reviewer A:

This paper has no novelty and contributions yet. The title has not been effective and efficient, and has not provided a novelty description and contribution. Abstract does not match the existing template, maximum 250 words. Repair and use effective and efficient camouflage. Complete abstract, consisting of background, objectives, methods, research results and conclusions. The brief abstract contains three things, namely the objectives, methods and results obtained from the research. The writing is in accordance with the provisions, namely the maximum number of words is 250 words. Preliminary writing is not good, there is no gap analysis, there is still no strong data for this research background. The written introduction is still ineffective and inefficient, and there is no clear and good contribution and research update. Improve the introduction, in the final paragraph by adding the research objectives in the last section. The research method is still not good, give the research stages systematically. Add a flowchart so that the research systematic is clear and easy to understand. The discussion is not good and there are still lack of arguments

that support or contradict the research results. Please provide additional primary references from journals published in the last 5 years. Overall, paper writing is still not in accordance with the journal template for 2021. Conclusions have not been written well, correct the conclusions by using effective and efficient sentences. Do not write conclusions in bullet points, but make it in a narrative form based on the main results obtained in accordance with the research objectives.

Editor

Reviewer A:

This paper already has novelty, but the contribution is not well illustrated. Improve sentence writing and title selection so that this manuscript has a good contribution. Improve introduction writing by using effective sentences. Writing introductions and paragraphs with efficient and effective sentences. The conclusion is still not effective and efficient, so in one paragraph it consists of 4-5 sentences. Suggest what gap analysis is based on accurate data. Improve references with primary references that match your research topic. Give a clear and strong purpose to the final sentence of the last paragraph Introduction.

In the method section, there are still deficiencies in the clear and systematic explanation of the research stages. The improvement that must be done is to add a flow chart to the method. Strengthen your method by using systematic stages, starting from the initial stages of research (preparation of samples and populations or preparation of materials needed at the beginning of the research), implementation stages (in the form of research procedures with systematic stages and clear and accurate stages), and

stages. final or evaluation (in the form of data collection techniques, data interpretation techniques, and data analysis based on clear indicators and instruments). Explain whether this method was done well or not, clarify and improve it again with the use of efficient and effective sentences.

In writing, there are still errors in making tables that are not in accordance with the latest journal template in 2021. Fix it by referring to the template. Also fix images with proper proportionality, legible size and good image quality (300 dpi). This improvement also includes how you display figures and tables properly and proportionally, for example only 3-4 images and 2-3 tables are displayed.

The writing of the discussion is still not effective and efficient. The discussion is still not supported by relevant data. Pay attention to the symptoms and phenomena that you find from research, then present supporting and contradictory arguments as an interesting discussion and provide clarity on the events and findings that you get. Present an argument with the most recent references (from journals published in the last 5 years). Improve the discussion with the conclusions that you make yourself at the end, as a comment from you on the research results that you get.

Writing conclusions has not been effective and efficient. Include key data or indicators of your research results. Use effective and efficient sentences in writing the conclusions that you get from this research.

Present the core data that you produce, and present your interpretation with effective and efficient sentences in just 1 or 2 paragraphs. Don't make conclusions in the form of bullet points or numbers that you come up with. Fix the conclusion properly as noted above.

In particular, you need to improve in writing, by considering how to present arguments in good, effective and efficient sentences. In writing, one paragraph should be written in 5-6 sentences, and consists of 35-45 words, so that the paragraph is not long and becomes effective. Keep paragraphs shorter and explain the phenomenon and interpret the results in a good, concise and clear manner.
