### Title and Abstract

Title	A Novel Algorithm for Monitoring Field Data Collection Officers of Indonesia's Central Statistics Agency (BPS) Using Web-Based Digital Technology
Abstract	This study focuses on the creation of a novel algorithm for monitoring field data collection activities by field data collection officers from Indonesia's Central Statistics Agency (BPS) using web-based digital technology. The purpose of this study is to check the accuracy and veracity of data collected by the BPS data collection officer. In this research, the total number of respondents whose data was collected is 200 respondents were collected by 10 data collection officers of Indonesia's Central Statistics Agency (BPS) and monitored by 5 supervisors officers from BPS then process monitoring is supervised by Head of BPS at a certain central office. The process of data collection uses the method of web-based digital technology. The algorithm is developed by response data from the BPS officers in the form of their response data
