-- Similarity score of your manuscript must be less than 20%

Dear Prof/Dr/Mr/Mrs. irzal irzal arief whisky,

Thank you for submitting the manuscript entitled "Optimization Deep Learning with Rough Set Approach Model Classification Otitis Disease" to Indonesian Journal of Electrical Engineering and Computer Science. With the online journal management system that we are using, you will be able to track its progress through the editorial process by logging in to the journal web site:

Manuscript URL:

<https://ijeecs.iaescore.com/index.php/IJEECS/author/submission/34772>

Username: irzal_rief

Number in the above Manuscript URL is your paper ID number.

In order to reduce delays, authors should adhere to the guidelines for authors of the journal (<https://iaescore.com/gfa/ijeecs.docx>) at every stage of manuscript processing, right from submission to the revision stages.

Please take a look at:

<http://ijeecs.iaescore.com/index.php/IJEECS/about/editorialPolicies#custom-4>.

Before the review process, please re-upload your updated paper as the "author version" in the same paper ID number as soon as possible, by considering the checklist for avoiding delays in the review process.

When contacting us, please always include your paper ID number in the subject line of your email.

Thank you for considering this journal as a venue for your work.

Best Regards,

Prof. Dr. Seifedine Kadry

Attention Please!

-
1. Add the names of all authors (by Edit Metadata), and please provide active or valid emails, as well as author identifiers and academic social network profiles, such as Google Scholar, ORCID, Scopus, and Web of Science ResearcherID (formerly Publons). You can also add your Academia.edu, ResearchGate, LinkedIn, Loop, and other profiles. Please keep in mind that if you do not supply complete, identical, and correct identities between the metadata and the actual document, your article will be rejected!!
 2. A single author is NOT preferred in this journal unless it comes from a qualified researcher (min WoS/Scopus h-index: 15). We would like to publish high quality papers of a research group. Paper with single author normally will be REJECTED.
 3. We intend to maintain and improve the journal's high standards of excellence, visibility, and future development. The goal is to increase the quality of the journal articles and their visibility, all while keeping the journal indexed, improving the SJR, SNIP, and CiteScore in Scopus, and getting it indexed in the Web of Science.

The following message is being delivered on behalf of Indonesian Journal of Electrical Engineering and Computer Science.

-- Paper ID# 34772

-- Authors must strictly adhere to the guide for authors, MS Word:

<http://iaescore.com/gfa/ijeecs.docx>; LaTeX format:

<http://iaescore.com/gfa/ijeecs.rar>

-- Research Paper: min 25 references (primarily to journal papers) and

Review/study/survey Paper: min 50 references (primarily to journal papers)

Dear Prof/Dr/Mr/Mrs. Irzal Arief Wisky,

We have reached a decision regarding your paper submission entitled "Optimization Deep Learning with Rough Set Approach Model Classification Otitis Disease" to Indonesian Journal of Electrical Engineering and Computer Science, a Scopus (<https://www.scopus.com/sourceid/21100799500>) with CiteScore: 2.9, SNIP: 0.528 and SJR: 0.272 and Scimagojr (<https://www.scimagojr.com/journalsearch.php?q=21100799500&tip=sid&clean=0>) indexed journal.

Our decision is: Major Revisions Required.

1. Authors should have made substantial/intellectual contribution (the new findings with contrast to the existing works). Highlight the main theme of the work with the specific goals of the design and development approach. For preparing your paper strictly adhere to the guide of authors, please read the checklist for preparing your paper for publication at:

<http://ijeecs.iaescore.com/index.php/IJEECS/about/editorialPolicies#custom-5>.

Please try to follow the format as closely as possible.

2. Attention Please! Method section

The experimental/method section is a straightforward description of what you did in your research and how you did it, clear and detailed at every stage.

A detailed method section will make your article reproducible by other researchers, allowing them to trust and build on your work.

- A detailed explanation of all methodologies, instruments, materials, procedures, measurements, and other variables used in the investigation.

- A thorough description of the data analysis and decisions for excluding some data and including others.

Please submit your revised paper in MS Word file format (or LATEX source files; ZIP your files if you present your paper in LaTeX). Refer to materials at: <https://bit.ly/35R6JTs> and <https://bit.ly/2DxU9MI> for further guidelines, and submit the revised paper within 8 weeks through our online system at the same ID number (NOT as a new submission) on Tab "Review" as an "Author Version" file for re-review by Reviewers. Then, your revised paper will be judged for final acceptance, revisions, or rejection based on the editor's and Reviewers comments.

I look forward to hearing from you

Thank you

Best Regards,

EDITOR-IN-CHIEF COMMENTS:

1. The introduction should contextualize your study and give any specialized information the general measurement or control reader may require to understand what follows. It must describe the importance of relevant earlier work and the challenges your work solves. It should also list your work's comparators. The introduction should define the article's contribution(s) and show how it's shown in the rest of the manuscript. A typical introduction should be as brief as possible and would contain the following:
 - a. An outline of the problem.
 - b. A review of the relevant literature, noting briefly the major contributors and indicating:
 - What the main contributors did?
 - What the main contributors found?
 - c. A statement of unsolved problems and/or areas requiring improvement; particularly the one(s) considered in your manuscript.
 - d. In regard to the above, describe what you will perform that has not been done before (what are your new contributions?).
 - e. An outline of how the following sections show what you did and how its relevance will be demonstrated.

2. This paper contains no critical discussion, comparison, or interpretation. What are the ramifications of your findings? What will come

in handy in the future?

ASSOCIATE EDITORS COMMENTS:

1. The method section is a detailed step-by-step description of the experimental procedure that includes all of the information needed to replicate the work described in the paper. The Method must include a description of both novel and standard experimental approaches, as well as whatever minimal justification is required to persuade the reader that the methods are correct.

A well-written Method section:

1. Is the "how-to" section of your paper, containing all of the pertinent details for producing your results.
2. Persuades the reader that your approach is correct by providing justification for selecting your methodology, which may include analysis or theoretical justification.
3. Gives readers the details, algorithms, and techniques necessary to confirm and/or replicate your findings

The Methods section's purpose is to describe how the questions and knowledge gaps raised in the Introduction will be addressed in the Results section.

2. Please look for related references at <https://ipmugo.com>, read them, and cite them to improve your paper.

Dear Prof/Dr/Mr/Mrs: Irzal Arief Wisky,

It is my great pleasure to inform you that your paper entitled "Optimization Deep Learning with Rough Set Approach Model Classification Otitis Disease" has been initially ACCEPTED and will be PUBLISHED on the Indonesian Journal of Electrical Engineering and Computer Science, a Scopus (<https://www.scopus.com/sourceid/21100799500>) and ScimagoJR (<https://www.scimagojr.com/journalsearch.php?q=21100799500&tip=sid&clean=0>) indexed journal. Congratulations!

Please submit your below documents within 30 days to ijeecs.iaes@gmail.com

1. Final camera ready paper (in MS Word file format, or LaTeX source files)
2. Similarity report checking (that the result is below 25%, uses software such as iThenticate or Turnitin), and
3. Payment evidence

Your paper will be published after fulfilling all requirements for publication (strictly follow the guidelines at <http://ijeecs.iaescore.com/index.php/IJEECS/about/editorialPolicies#custom-5>). The presentation of the simulation and/or experimental setup (in the Method section) must be clear and complete in every detail facilitating reproducibility by other scientists. Present a picture of your

simulation and/or experimental setup and describe your work clearly. For your information, according to international regulations, the similarity score of camera-ready paper should be less than 25%. A single author is NOT acceptable, and will never publish in this journal. The editor(s) will decide whether or not your camera-ready paper is complete and meets the final guidelines. Please present each reference as completely as possible while adhering to IEEE style (including volume, number, pages, and DOIs).

When you send in all of the above documents and your final paper follows all of the final instructions, your paper will be judged "fully accepted." It will be the date of your paper's acceptance.

We are looking forward to hearing from you

Best Regards,

S. Kadry

In order to cover part of the publication cost, each accepted paper is charged USD 315. This charge is for the first 8 pages, and any published manuscript over 8 pages will incur extra charges of USD 50 per page. Indonesian authors should transfer IDR instead of USD. (Please refer to <https://www.xe.com> for the exchange rate.) We value collaborative papers and do not value papers with a single (sole) author. Papers with a single author will be rejected (or, if very good, will be considered for publication but will be charged twice the above fee: USD 530, and any published manuscript with more than 8 pages will incur additional charges of USD 100 per page).
